

Item No.	Blade Length (mm)	Overall Length (mm)	Thickness (mm)
HS0001	290	575	0.6

Japanese Saw

- *Shank:ABS+TPR, with REACH passed.
- *Thanks to its double edge 6-8/17 tpi, it can be used effectively for trimming, dovetailing, woodworking, finish cuts and fine wood cutting.
- *Since the blade is impulse hardened (by rapidly alternating hot and cold temperatures) for increased hardness and plated with electrophoresis process, it's extremely durable and resistant to corrosion.
- *In order to keep saw blade resistance to a minimum, the company logo would be printed on with lasers.
- *Quick Release - Easy to install and remove blades from plug-in Handles.
